## About Me

I'm a Software Engineering student at the State University of Trade and Economics (SUTE). I'm developing my skills in fullstack web development — from frontend interfaces to backend logic. Currently, I work with Node.js, Express.js, and EJS, and I'm learning React, Next.js, and Redux to become a fullstack developer. I enjoy experimenting, building small projects, and improving my understanding of modern web technologies.

## Education

### **State University of Trade and Economics (SUTE)**

Bachelor's Degree in Software Engineering | 2025 – Present

## Technical Skills

Frontend:	HTML, CSS, JavaScript, EJS, React (learning)
Backend:	Node.js, Express.js
Databases:	MongoDB (basic)
Frameworks & Tools:	Next.js (learning), Redux (planned), npm, VS Code
Version Control:	Git, GitHub
Other:	REST API, routing, component-based architecture

## Projects

**Personal Web Page (HTML + CSS)** — my first simple webpage with personal information and layout practice.

**Node.js Practice (Express + EJS)** — small learning projects: routes, templates, and form handling.

**Next Learning App (React + Next.js)** — current learning project focusing on frontend development and APIs.

## Currently Learning

React, Next.js, Redux, API integration, and advanced JavaScript patterns.

## Version Control (Git)

Confident with basic Git commands: init, add, commit, push, pull, branch, merge. Experienced in using GitHub to store and organize code repositories with README files and pinned projects.

## Languages

- Ukrainian — Native
- English — Advanced (C1)
